

The Convergys 300 W inverter turns your 12V battery into a 230V power source, able to supply or recharge any device up to 300W. It can be supplied:

- Through the cigar-lighter outlet (output power up to 150W)
- Through the battery clamps (output power up to 300W)

Besides the 230V socket, a 5V USB socket allows connecting various devices, such as MP3 players, digital cameras, etc...

Simplicity and efficiency

- ✓ Can be plugged on a single cigar lighter outlet, or on the battery terminals.
- ✓ **Light, compact** and versatile for use in any circumstances (business trips, travels...)
- ✓ **2 sockets** for any type of electrical device (230V + USB)

Safe to use

- ✓ Thermal protection, fan and ventilation
- ✓ Protected against overload and short-circuits
- ✓ Protected against over and under voltage

 Ref. 027046
