Order no.: 41286

Article number: 41286

EAN: 4010995412869

Customs tariff number: 85131000

Simplifies your work: Retaining clip and magnetic positioner on the lid allows you to keep hands free for other tasks.

Simplifies your work: Integrated laser makes it easier to fix position more precisely and project measurements for ceiling installations, for example. Perfect light positioning thanks to lamp head swivelling in an L shape.

Increases your efficiency: Very strong LED lamp – two light intensities to adjust to light conditions as required. Includes laser and UV light.

Increases your safety: Power-on time of 2 seconds prevents the laser being activated by accident.

Product dimensions: 192 x 110 x 31 mm (LxWxD)

Application: Laser to position drill holes on the ceiling. UV light suitable for technical inspections.

3in1: powerful LED light, laser function and UV light

Swiveling flashlight head

Free hands thanks to magnetic holder and belt clip

The multi-functional flashlight sheds light on things in three ways. A universal work tool, it features an integrated laser, UV light and LED light. The LED light function provides two lighting levels, which allow you to adjust the flashlight to specific light conditions, thus improving your field of vision. The practical retaining clip and the magnetic positioning mechanism free your hands for other tasks. Thanks to the integrated magnets, this flashlight can also be positioned as required in most electrical enclosures. The lamp head also swivels into a L-shape, enabling the user to point the light source in the direction required for the task at hand. The integrated laser makes it easier to fix positions more precisely and project measurements when installing lights on the ceiling, for example. A delayed switch-on interval of 2 seconds prevents the laser being activated accidentally. This flashlight is also eminently suitable for technical inspections thanks to its integrated UV light.

Customs tariff number	85131000
-----------------------	----------

Self service - packing	Yes
------------------------	-----

LED min (lm)	100 lm
LED max (lm)	310 lm
Laser	Class 2
UV min (nm)	390 Nanometer
UV max (nm)	400 Nanometer
Battery type (IEC designation)	3x AAA batteries
Overall length (mm)	153 mm
Tool for electrics	No
Country of origin (ISO 3166-1 Alpha 3)	CHN
