Order no.: 23040

Article number: 23040

EAN: 4010995230401

Customs tariff number: 82054000

Simplifies your work: The variable handle position guarantees power fastenings as well as fast fastenings.

Increases your efficiency: The most common drives cleverly organized in one tool.

Saves time: Thanks to its simple operation, the desired drive can be used quickly.

Product dimensions: 120 x 41 x 33 mm (LxWxD)

Application: Suitable for portable use and workshop tasks. The folding holder allows hex screws to be lifted out of or inserted into holes even in hard-to-reach places.

The most common drives

Can be used as a horizontal or longitudinal handle

Versatile use

No more trapped fingers. The PocketStar® L-key set impresses with its optimum handling and great utility, which is expressed in a multitude of practical features. The seven L-keys are stored in a handy, fiberglass-reinforced folding holder. A clever opening button allows to easily select the required key size. You can freely choose from many different work positions between 90° and 270°, depending on the screw fastening task at hand. In the 180° position, the tool is transformed into a screwdriver, for example. When the key is positioned on the 270° stop, the folding holder becomes a tool with a practical lever arm for high torques. It is also a clever solution for situations where users require just one single key to move in the work position since PocketStar stops the other keys from swinging back and getting in the way.

Content:

- 1x hexagon Blade 2
 - 1x hexagon Blade 2,5
 - 1x hexagon Blade 3
 - 1x hexagon Blade 4
 - 1x hexagon Blade 5
 - 1x hexagon Blade 6
 - 1x hexagon Blade 8
