

# PTFE-Spray

## LOS 210

**LOS 210** is a strongly adhering lubricant and separating agent without any grease. For the application at conveyors, hinges, carriage rails, etc.

**Use:**

Shake the aerosol can vigorously before use.

Spray LOS 210 thinly from a distance of approx. 30cm. After spraying there will be a dry separating and gliding film, which is dirt- and water-repellent. Remove oil, dirt and grease from surfaces.

**Technical Data:**

Form:	Aerosol
Colour:	whitish
Odour:	like Petrol
Density (20°C):	0.59 g/cm <sup>3</sup>
Flash point:	<-60°C (Propellant)
Temperature resistance:	-50°C bis +260°C (short-term)
Solubility:	not water-soluble
Water hazard class:	WGK 1 (self-classification)
Packaging:	400 ml aerosol can (15 pc.)
